party encoder to export MP3 files with Audacity. See the [LAME Legal Issues](#) page for more details.

## Windows

1. Go to the external [LAME download page](#)

*Left-click this link, do not right click.*

2. Directly underneath "For FFmpeg/LAME on Windows click below:", left-click the link **Lame v3.99.3 for Windows.exe** and save the file anywhere on your computer.
3. Double-click "Lame v3.99.3 for Windows.exe" to launch it (you can safely ignore any warnings that the "publisher could not be verified").
4. Follow the Setup instructions to install LAME for Audacity, making sure not to change the offered installation location of "C:\Program Files\Lame for Audacity" (or "C:\Program Files (x86)\Lame for Audacity").

You should now be able to export MP3s without any further configuration, choosing **File > Export Audio...** then selecting "MP3 Files" in the [Export Audio Dialog](#).

**TO DOWNLOAD Lame and FFmpeg for Windows, click links BELOW:**

*If Audacity does not detect LAME, download the ZIP option, extract the files inside to a well known folder, then open Audacity, go to Library Preferences and configure it to search on the well known folder you extracted the files to.*

**NOTICE: As of 2014-June-27 Clam Antivirus is showing a false positive for Lame\_v3.99.3\_for\_Windows.exe - Thanks user J.Garcia for contacting me. FILE IS SAFE, but always check your downloaded files with [www.virustotal.com](http://www.virustotal.com).**
